## General description & specifications

High performance, ultra-compact, full range, two way bi-amp/passive cabinet. It consists of a 12"transducer and a 1" high frequency compression driver.

They offer 2 dispersion options. The model HR-1264/5 provides a narrow dispersion of  $60^{\circ}$  x  $40^{\circ}$  (rotatable) and the model HR-1296/5 offers a wide dispersion of  $90^{\circ}$  x  $60^{\circ}$  (rotatable).

This enclosure is ideal for a wide variety of applications and has a range of accessories that provide an easier assembly. Although this cabinet can be used without a processor, we strongly recommend that the cabinet presets are applied for maximum optimization and performance.

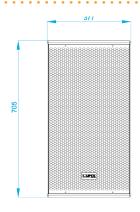

For Low Frequency reinforcement, several subwoofer options are available
